

PALISADE PACK

This full-featured custom pack holds the essentials for quick-response operations or team trainings; it also works as a great urban or travel backpack. Many of the features of its big brother, the Whitney Pack, are included. Made of water-resistant 500-denier CORDURA® nylon, it's built to last with enough pockets to keep everything within easy reach. Organize your helmet, gloves, water bottle, eye protection and other must-have gear in separate pockets. Padded back and shoulder straps feature breathable D3 cloth, and a lightweight waist belt and sternum strap enhance comfort when loaded. A variety of MOLLE and other external attachment points allow for the addition of extra gear. The pack also features a loop strip for name tags or other ID, reflective strips, a strategically placed top carry handle with pass-through sleeve, and a fleece-lined pocket that offers additional scratch protection for your sunglasses, goggles or electronic devices. Available in two colors, Coyote or Red.
